

# MRI Scan Report

Patient Name:	John Doe
Age:	32
Gender:	Male
Patient ID:	P123456
Date of Report:	2025-09-07

## Clinical Findings:

The patient underwent MRI for evaluation of persistent headaches.

## Diagnosis:

MRI brain scan shows no structural abnormalities. No evidence of tumor, hemorrhage, or infarction.

## Recommendations:

1. Adequate rest and stress management.
2. Pain relief medication as prescribed.
3. Neurology follow-up if symptoms worsen.

**Doctor:** Dr. Emily Carter, MD

**Hospital:** City Health Clinic
